Skills

Skills: Zustand, C/C++, React, React Native, Web Development, HTML/CSS, SEO, Firebase, SQL, Python, JavaScript, TypeScript, React.js, React Native, Node.js, Python, Redux.js, Context API, Tailwind CSS, Sass, Express, REST APIs, Firebase Auth, Firestore, Postgres, MongoDB, MySQL, Redis, Git, Docker, CI/CD, Agile, Google Firebase, Google Places API, Expo Router, React Native Maps, FastAPI

Professional Experience

CCS Communications   **Los Angeles, CA**
Full Stack Developer   *August 2023 - Present*
- Improved site performance by 30% by engineering frontend features using React and TypeScript and enhancing backend APIs with Node.js and Firebase, ensuring seamless user experiences across web and iOS platforms.
- Reduced API latency by 25% by optimizing backend data flows and implementing secure REST APIs, leveraging data science best practices to support real-time data sync and authentication for consumer-facing applications.
- Decreased development time by 30–40% by refactoring large-scale codebases into reusable React component libraries, collaborating with Product and Design teams to define specs and accelerate rapid prototyping for new features.
- Contributed to cross-platform development by partnering with frontend, backend, and iOS engineers to deliver scalable features, participate in specs creation, and implement rapid prototyping workflows for new product launches.

CLM Group Inc.   **Los Angeles, CA**
Web Developer   *December 2019 - August 2023*
- Increased lead capture efficiency by 95% for a skincare manufacturer's digital storefront by developing full-stack solutions using React, Next.js, TypeScript, and Firebase, implementing secure backend API routes and Google reCAPTCHA for spam protection.
- Enhanced user experience and cross-platform consistency by building frontend components with React and Tailwind CSS, ensuring a modern UI across web and iOS surfaces and collaborating on technical specs for scalable architecture.
- Accelerated feature delivery and experimentation by utilizing full-stack and Rapid Prototyping techniques with TypeScript and Firebase, rapidly iterating on user-facing features and gathering feedback for continuous improvement.
- Improved codebase scalability and maintainability for a digital commerce platform by organizing frontend and backend code into reusable, type-safe components with TypeScript, supporting future growth and aligning with best practices in specs documentation.

Projects & Outside Experience

MuzMates - Gender-based Muslim Roommate Finder App   **Los Angeles, CA, USA**
Founder   *June 2025 - Present*
- Onboarded over 2,000 users within 6 months by developing and deploying full-stack frontend and backend features for an iOS mobile app using React, TypeScript, Expo SDK, and Firebase, including multi-provider authentication and real-time messaging.
- *Link to project*

WordApp   **Los Angeles, CA, USA**
Team Leader   *February 2025 - June 2025*
- Achieved over 2,000 downloads on the iOS App Store by leading full-stack development and rapid prototyping of a high-performance vocabulary learning app using React Native, TypeScript, and FastAPI for frontend and backend.
- *Link to project*

Education

California State University - Northridge   **August 2023 - May 2025**
Bachelor's, Computer Science   *GPA: 3.7*

Los Angeles Pierce College   **August 2021 - December 2023**
Associate's, Computer Science   *GPA: 3.8*
